Chapter 797 Meeting

Tuesday October 18th, 2011

The monthly meeting (on the 3rd Tuesday) will be held at the Suwannee County Airport at our EAA Chapter Building at approx. **7:00 PM.**

“Sheryl’s Buffet” will provide the entrée for dinner at **6:00 PM.** All of our members are asked to bring a dish to share with everyone. Last names A-L please bring a dessert and M-Z please bring a veggie or salad.

EAA 797 Fly-In Breakfast

The LAST Saturday of the month

October 29th

President’s Message

October is here and that means beautiful weather is here for flying, so get to it. Well maybe that hasn't been the case so far this month, but I have high hopes for the second half.

This month we have quite a few decisions to make, and I hope all our members can attend. We will be covering the following topics as they need to be finalized - the Christmas party, Officers, and the Civil Air Patrol use of our building.

Hope to see all of our members there.

Reid

September Meeting

- Still waiting for prices on places to have our Christmas party
- Civil Air Patrol would like to return to our building. This will be discussed further at our next meeting.
- Next meeting we will have nominations for Officers for 2012
- STILL waiting for payment from Sun N Fun

F.Y.I.

Fly-Outs

Looking for suggestions for locations for a Fly-Out.

Also, how about volunteering your house/air park for a coffee and doughnut Fly-Out? You supply the coffee and the Chapter or anyone that flies in brings the doughnuts, muffins, etc.

PHILIP A. CARNEVALE, M.D.

- CERTIFIED FAA SENIOR AEROMEDICAL EXAMINER
- CERTIFIED GROUND INSTRUCTOR ADVANCED & INSTRUMENT (AGI/IGI)

EAA, AOPA

to Ask for

Medical Certification Exemption

EAA President/CEO Rod Hightower

I joined AOPA president Craig Fuller on stage at AOPA Summit in Hartford, Connecticut, recently to announce a joint initiative that can keep more people flying in familiar aircraft. The joint EAA/AOPA proposal is to allow pilots who fly recreationally under certain parameters to use their driver's license medical certification instead of a third-class medical certificate. This has been something continually requested by EAA members over the past 25 years. The sport pilot category, which uses driver's license medical certification, has further proven that medical issues are not a significant factor in accidents. The request for the exemption, expected to be formally submitted to the FAA in early 2012, can actually enhance safety because of a provision that requires pilots to pass an online education course on aeromedical factors and self-certification to receive the exemption. The exemption would save millions of dollars for pilots and the FAA. The EAA and AOPA government relations staffs are continuing to finalize the exact language of the exemption request, but the feedback was overwhelmingly positive at AOPA Summit following the announcement. Those staffing our exhibit at the event reported a number of new EAA memberships because of the initiative and the unity of EAA and AOPA on the issue.

Flying Is Flying

By Dan Grunloh, Editor, Light Plane World

You shouldn't tell a disabled person that he can't do something, unless you want him to go out and try to prove you wrong. David Sykes flew 11,400 miles with his wheelchair packed on his trike because a friend in a pub wagered he wouldn't do it. Vance Breese flipped his motorcycle at 265 mph and overcame a traumatic brain injury to become a pilot after doctors said his life was over. [Read more](#)

Nylon Airbike Made With Lasers

The aviation industry uses advanced manufacturing techniques such as the laser-based ALM process (additive layer manufacturing). The EADS Aerospace Innovation Centre has built an Airbike entirely of fused nylon, which results in a product requiring no maintenance.

FAA RE-REGISTRATIONS MOVING RIGHT ALONG

With about a third of the FAA's civil aviation re-registration process complete, the Civil Aviation Certification Branch reports that things are going better than expected thanks to more aircraft owners performing their re-registrations online rather than through the mail, according to Walter Binkley, branch manager. MCCAULEY DELIVERS COMPOSITE PROP FOR SKYCATCHER

McCauley has built a fixed-pitch propeller entirely from composite materials, saving nearly 5 pounds compared to the aluminum prop originally created for the Cessna 162 Skycatcher LSA. McCauley uses a single fiber construction technique, making the propeller strong and lightweight. The composite prop named 1L100 is 66 inches in diameter and weighs 9.3 pounds compared to the 14.2 pound weight of the aluminum prop it replaces. [Read more](#)
